Message from the President

Toboku Gakuen was founded in 1886 as Sendai Theological Seminary by Masayoshi Ohashi and William E. Hoy, a missionary. Today, 132 years later, based on Christian ideals and insuring academic freedom, Toboku Gakuen University (TGU) aims to provide its students with an environment that allows them to pursue the truth and to develop to their full potential.

The world today is changing dramatically; socially, politically, economically, and in other areas as well. It is our mission to send forth graduates who have a global perspective, individuals who are responsible and have the ability to make decisions and act upon them. To this end, TGU is committed to nurturing the character of each individual student while also providing the education necessary so that they have the ability to integrate the knowledge of their discipline and interface with others. From the humanities and social sciences to engineering, TGU has 6 faculties and a graduate school and is the largest private university in the Tohoku and Hokkaido area. Since its foundation, TGU has been a place where people from different nations and cultures have come to study together, facilitating and contributing to the increased understanding of each culture represented. It is a tradition we are proud to continue.

Norio Matsumoto, President

東北学院は1886年（明治19年）、岩手県盛岡市に創立されたユリアム・ホイ邸の賓館として設立されました。132年後の今日では、キリスト教の精神に基づき、一人ひとりの学生が学問的自由を守りつつ、学問生活を通じて真理を求める、自らの潜在能力を開花できるよう指導に努めております。

世界は、社会・政治・経済などとあらゆる領域で急速に変化しております。グローバル化の視野を持つ、自らの判断によって行動する能力と責任ある人材を育成するために、本学ではこれまで重視してきました個性尊重の人格育成に加え、それぞれの分野の専門教育をバランスよく展開しております。本学は、人文社会系から理工系まで、6学部と大学院を有し、東北・北海道を含む日本を代表する私立大学です。これより、これらから生まれた多様な国籍や文化をもつ学生や教職員が共に学び、国際的相互理解の推進に貢献したいと考えております。

Message from the President

Three-part plan on education

Faculty of Letters

Faculty of Economics

Faculty of Business Administration

Faculty of Law

Faculty of Engineering

Faculty of Liberal Arts

Graduate School

Tuition and Fees for the Academic Year 2018

Academic Calendar

International Exchange

Toboku Gakuen University at a Glance
In order to increase understanding of our institution, in 2016 Tohoku Gakuin University revised the following “three-part plan” which outlines (1) the principles underlying the type of students we seek to graduate; (2) the educational programs employed to this end; and (3) the types of students we seek to attract. Part 1 of this plan is as follows.

Policy for Granting Degree

TGU grants a bachelor’s degree to students who have gained the required number of credits in the academic department to which they belong and who have fulfilled the following criteria.

1. Able to think critically about how to live a good life in the modern world according to the teachings of Christianity.

   Our students can understand how the message of the Bible is relevant today, and can explain their own understanding of how to live a good life in our society.

2. Able to utilize generally applicable skills and English skills for intellectual activities.

   Our students can acquire and utilize the generally applicable skills (e.g. communication skills, logical and critical thinking skills, information literacy, mathematical and scientific literacy) which form the basis of intellectual activities.

3. Able to show an awareness of the world from various perspectives and to understand a variety of different views, ideas, and values.

   Our students can show awareness of their own identity and of the world around them from various perspectives in terms of history, society, nature, and other key areas. They can demonstrate their ability to discern different perspectives, values, and ways of thinking.

4. Able to demonstrate technical knowledge within their major field of study, and to show their understanding of this knowledge and related methods of inquiry.

   Our students can summarize the knowledge and methods of inquiry they have learnt in their major field of study, and can demonstrate their understanding of specialized knowledge within this field.

5. Able to identify the root causes of problems and to find solutions using the academic skills they have acquired.

   Our students can identify various issues within our society and can exploit their academic achievements to find solutions to these issues.
“Think for yourself. Think for the world.”

The Faculty of Letters includes three departments: the Department of English, the Department of General Humanities, and the Department of History. Students in the Faculty of Letters study various aspects of the nature of humanity through studying philosophy, history, art, and literature. Students are encouraged to exchange ideas, experiences, and knowledge in their pursuit of new insights and development of their full potential.

The English Department offers students a comprehensive education in English language and literature, covering a wide range of topics such as literature, language, culture, and society. The Department provides a holistic approach to the study of English language and literature, enabling students to develop their reading, writing, oral, and cross-cultural communication skills.

The History Department focuses on the study of historical events and processes, encouraging students to think critically and develop the ability to analyze and interpret historical phenomena. The Department of General Humanities aims to provide a broad education that encompasses various fields of knowledge, fostering critical thinking and problem-solving skills.

The Department of Cultural Studies explores the relationship between culture and society, examining how cultural practices and representations shape and are shaped by social structures. The Department of English Literature focuses on the study of English literature, providing students with a deep understanding of the works of major English authors and their historical contexts.

The Department of History and Cultural Studies aims to provide students with a comprehensive understanding of historical events and processes, as well as the cultural, social, and political context in which they took place. The Department of Humanities and Social Sciences focuses on the study of human behavior, society, and culture, emphasizing the interdisciplinary nature of these fields.

The Department of English Literature and Cultural Studies offers a wide range of courses in English language and literature, covering various periods and genres. The Department of History and Cultural Studies provides a comprehensive overview of world history, focusing on major events and developments.

The Department of General Humanities and the Department of Cultural Studies aim to provide students with a holistic understanding of human culture and society, encouraging them to think critically and develop their abilities in research and analysis.

The History Department focuses on the study of historical events and processes, encouraging students to think critically and develop the ability to analyze and interpret historical phenomena. Graduating individuals who can respond to the needs of an ever changing economic environment and productively contribute to the development of both the local and national economy.

The Faculty of Economics has two departments, the Department of Economics and the Department of Co-existing Society Studies. In each department, students study both the theoretical and applied aspects of social issues related to their discipline.

The Department of Economics offers a diverse range of courses in both theoretical and applied economics. The curriculum develops students’ ability to analyze the current state of the economy and identify the socioeconomic issues facing Japan and the Tohoku region, thus enabling them to formulate appropriate policy given the socioeconomic environment. In the first 2 years, students are required to take subjects in which they develop a fundamental understanding of economic theory, policy, and analytical techniques. In their final 2 years, students are able to choose from a diverse range of theoretical, applied and policy related courses. Seminar classes are offered at every grade. The size of these seminars is limited so that each student can receive the individual guidance needed to further develop their understanding of economics and the analytical skills necessary to provide them with the ability to adapt to the ever changing economic environment.
To foster a creative business mentality capable of producing new value

新しい価値を生み出す創造的なビジネスマインドを育てる

Department of Business Administration
工商管理学系 / 経営学科

The curriculum of the Department of Business Administration is designed to develop managers and entrepreneurs who will be future leaders in business.
Utilizing both theoretical analysis and case studies, students study how individuals, firms and society-at-large can be creative in meeting changing needs. In the first and second years, students are required to take introductory courses in management and accounting. In the third and fourth year, a wide variety of subjects are arranged in four model-courses (management, marketing, finance, and accounting), so that students can easily find subjects in which they are interested.
Management and marketing courses focus on issues relating to the management of companies. Finance courses deal with financial markets and wide-ranging issues related to financial markets. Accounting courses focus on developing an understanding of the principles and implementation of proper accounting practices.

This is a 1-day conference for business and economics students. The conference includes lectures, seminars, and workshops.

The conference offers a variety of sessions on business administration, including management, marketing, finance, and accounting.

Courses:

Management course
Trains students on the development of new businesses and strategic planning; the management of companies; hospitals and social service facilities; project management; human resource management.

Marketing course
Prepares students for work in products and services development; event planning; customer support.

Finance course
Trains students to work as a financial planner; stock analyst; bank worker; stockbroker.

Accounting course
Prepares students for work in tax accounting; general accounting (CPA); accounting for planning and control.

The Faculty of Business Administration offers the opportunity to study a variety of aspects of business administration including the management of businesses and non-profit organizations and innovative city planning.

By adopting a broad approach to the study of administration, the relationship between a variety of factors can be explored (e.g., international events, community needs, market trends, strategic planning and capital procurement).

These factors, broadly organized into four fields (management, marketing, finance and accounting), can be effectively mastered in each of the four study courses offered by our department.

模式介绍:

工商管理课程
培养学生建立企业并进行企业经营的人才，比如医疗 - 福利设施的管理及经营，以及单元计划的制定和运作管理，还能进行人员费的开常管理。

市场营销课程
培养学生进行产品宣传及开拓新的销售服务人才。

金融课程
培养学生在金融行业及金融投资的研究生，精通金融业务的经营方式。

会计课程
培养学生具有市场管理、会计与财务的理论和实践专业人才。

模式コース紹介

マネジメント・コース

事業の企画・立案、会社の効率化の運営、プロジェクトマネジメント、人材の資源の管理、営業職などの仕事をした人の育成です。

マーケティング・コース

新製品・サービスの企画、イベント・ブラントナー、カスタマーサポートなどの仕事をした人の育成です。

ファイナンス・コース

ファイナンシャル・プランナー、証券アナリスト、銀行職員、証券売買等を担当する人の育成です。

アカウンティング・コース

会社の財務・組織計画、財務分析的な考え方等の仕事をした人の育成です。
The Faculty of Law seeks to develop in students an accurate knowledge of the law and an ability to answer fundamental questions regarding the necessity, rationality, practicality, and purpose of the law. First year students are required to take introductory courses on various aspects of the law. Second year students must choose one of the 6 courses according to his/her interests and future vocational preferences. The Faculty of Law seeks to graduate students who have an advanced knowledge of law and who are able to use that ability for the benefit of human dignity.

法学生は、法のルールを正確に知った上で、そのルールの必要性、合理性、実用性、目的性を批判的に考察する能力を養います。1年次では、専門科目を学ぶための基礎を学びます。2年次以降は、学びの自由度が高まります。各コースの内容を学び、各コースの内容を学び、各コースの内容を学びます。法律を理解することを目的としています。
Faculty of Engineering
工学系／工学部

To educate wise and ethical engineers and industrialists prepared to take their place in society
倫理観と習慣を備えた工学技術者・産業人として社会に進むための教育

The Faculty of Engineering consists of four departments:
工学の専門分野は4部門で構成です。
The Department of Mechanical Engineering and Intelligent Systems, the Department of Electrical and Electronic Engineering, the Department of Civil and Environmental Engineering, and the Department of Information Technology. Through each course of study, students are encouraged to acquire their specialty with a spirit of innovation and creative endeavor.
機械工学系、電気電子工学系、土木環境工学系、情報工学系の4部門で構成されています。各コースの学習を通じて、学生たちは自己啓発に情熱を持ち、創造性と創造性を持つための精神を培われるよう励まられます。

Engineering College of Mechanical Engineering, Electrical and Electronic Engineering, Environmental Engineering, and Information Technology.

Department of Mechanical Engineering and Intelligent Systems
機械知能工学専攻／機械知能工学科

The overall goal of the academic program in mechanical engineering is to train students and researchers who will make beneficial contributions to social development in the world.
機械工学の学部教育の目標は、学生や研究者を育むことにより、社会の発展に有益な貢献をする人材を養成することです。
The Department of Mechanical Engineering and Intelligent Systems offers students four academic programs: Control and Mechatronics, Bioengineering, Design and Manufacturing Technology, Energy Science and Technology. Each program is designed to provide students with the necessary background for a career in mechanical engineering, and to encourage them to be original and creative.
機械知能工学専攻

Department of Electrical and Electronic Engineering
電気電子工学専攻／電気電子工学科

This department provides teaching in the fields of electrical and electronic engineering as well as information and telecommunications. It is also responsible for nurturing human resources to support the development of an information-driven society. To enhance expertise, we are designing a new curriculum with an emphasis on power control systems, information communication systems, and electronic materials systems. Our students acquire a state-of-the-art knowledge of Power Generation + Transmission + Distribution and control technologies that make the best use of information technology, in addition to new electronic materials to support the future of information & communication fields. To encourage ingenuity and to consolidate students' knowledge, our full-time faculty hold seminar classes and supervise graduation research in their own research laboratories. Students can choose a range of qualifications in electrical engineering and also work towards a teaching license for technical high school.
電気電子工学専攻

Department of Civil and Environmental Engineering
建設及び環境工学専攻／建設及び環境工学科

In the Department of Civil and Environmental Engineering, students are educated in the following three areas: development of infrastructures [public works] that improve the quality of life; design and construction of buildings and homes; and addressing environmental problems such as water and soil contamination and prevention of natural disasters. The department provides a solid foundation of specialized knowledge in a broad area of research fields with the goal of graduating ethically minded engineers who have the insight and ability to develop and maintain architectural projects with a careful consideration of related environmental issues.
建設及び環境工学専攻

Department of Information Technology
情報基礎工学専攻／情報基礎工学科

This department is responsible for the major and active research areas such as Data Science (including machine learning), Cyber Security (including cryptographic engineering) and Communication Technologies (including wireless high speed telecommunications). We are in charge of nurturing human resources that contribute greatly to the local community. They are also expected to be International-class Engineers equipped with good sense of ethics.
情報基礎工学専攻
Faculty of Liberal Arts

To develop educated individuals capable of adapting to an ever-changing future society

The Faculty of Liberal Arts consists of four departments: the Department of Human Science, the Department of Language and Culture, the Department of Information Science, and the Department of Regional Design. The Faculty of Liberal Arts includes a wide variety of disciplines through which it aims to graduate students who have the ability to meet the challenges of society now, and in the future.

The Department of Human Science focuses on the study of human nature, society, and culture. It aims to foster students who can understand and analyze human behavior, and who can contribute to the development of society.

The Department of Language and Culture is designed to help students develop language skills in a variety of languages, and to understand the cultural contexts in which these languages are used.

The Department of Information Science provides students with the skills and knowledge necessary to work in the rapidly evolving field of information technology.

The Department of Regional Design focuses on the study of regional design, with an emphasis on the development of sustainable and culturally appropriate solutions for regional issues.

Department of Human Science

The Department of Human Science investigates various aspects of human nature and society from a variety of perspectives in order to increase students’ understanding of and insight into human behavior. The department aims to graduate students who have a comprehensive knowledge of theories and research of human behavior and the ability to analyze and solve real-life situations regarding human behavior. Students will acquire practical training and knowledge in experimental research and survey techniques in one of the following four areas: Psychology, Sociology, Education, and Sport Science.

Department of Language and Culture

The Department of Language and Culture supports academic teaching and research around the main theme of "language," which is central to human communication and civilization. In addition to studying languages, students in this department select a second foreign language from a choice of German, French, Chinese, and Korean. These courses are intended to help students develop their language skills in a variety of contexts. The department is committed to nurturing students who can understand and contribute to intercultural activities.

Department of Information Science

The Department of Information Science seeks to graduate students who have a comprehensive knowledge of information science and who have developed their skills in practical information processing. First and second year students are required to take introductory computer courses. Third and fourth year students must take courses in mathematical science, computer networks, computer science, and biological informatics. Students are expected to gain a comprehensive understanding of information processing in all areas and be able to utilize the skills and knowledge they obtain.

Department of Regional Design

The Department of Regional Design places an emphasis on "regional," i.e., students are expected to undertake various kinds of fieldwork and to visit and experience various regional planning activities. Students must undertake project analysis not only from the perspective of a specialist, but also from the perspective of local residents and users, to the end that each project can be fully utilized in improving people's lifestyles. This department aims to graduate students who will take the initiative in their work and who will be able to work well with others to improve the lifestyle of the local residents and users without having to rely on the local government and bureaucracy.

The Department of Regional Design offers the following four courses: Planning, Design, Urban Planning, and Environmental Design.

Department of Humanities and Sciences

The Department of Humanities and Sciences provides students with a comprehensive understanding of human nature and society. It aims to graduate students who have a comprehensive knowledge of theories and research of human behavior and the ability to analyze and solve real-life situations regarding human behavior. Students will acquire practical training and knowledge in experimental research and survey techniques in one of the following four areas: Psychology, Sociology, Education, and Sport Science.

Department of Informatics

The Department of Informatics provides students with a comprehensive understanding of information science and technology. It aims to graduate students who have a comprehensive knowledge of information science and technology and who have developed their skills in practical information processing. First and second year students are required to take introductory computer courses. Third and fourth year students must take courses in mathematical science, computer networks, computer science, and biological informatics. Students are expected to gain a comprehensive understanding of information processing in all areas and be able to utilize the skills and knowledge they obtain.

Department of Regional Design

The Department of Regional Design places an emphasis on "regional," i.e., students are expected to undertake various kinds of fieldwork and to visit and experience various regional planning activities. Students must undertake project analysis not only from the perspective of a specialist, but also from the perspective of local residents and users, to the end that each project can be fully utilized in improving people's lifestyles. This department aims to graduate students who will take the initiative in their work and who will be able to work well with others to improve the lifestyle of the local residents and users without having to rely on the local government and bureaucracy.

The Department of Regional Design offers the following four courses: Planning, Design, Urban Planning, and Environmental Design.

Department of Humanities and Sciences

The Department of Humanities and Sciences provides students with a comprehensive understanding of human nature and society. It aims to graduate students who have a comprehensive knowledge of theories and research of human behavior and the ability to analyze and solve real-life situations regarding human behavior. Students will acquire practical training and knowledge in experimental research and survey techniques in one of the following four areas: Psychology, Sociology, Education, and Sport Science.

Department of Informatics

The Department of Informatics provides students with a comprehensive understanding of information science and technology. It aims to graduate students who have a comprehensive knowledge of information science and technology and who have developed their skills in practical information processing. First and second year students are required to take introductory computer courses. Third and fourth year students must take courses in mathematical science, computer networks, computer science, and biological informatics. Students are expected to gain a comprehensive understanding of information processing in all areas and be able to utilize the skills and knowledge they obtain.

Department of Regional Design

The Department of Regional Design places an emphasis on "regional," i.e., students are expected to undertake various kinds of fieldwork and to visit and experience various regional planning activities. Students must undertake project analysis not only from the perspective of a specialist, but also from the perspective of local residents and users, to the end that each project can be fully utilized in improving people's lifestyles. This department aims to graduate students who will take the initiative in their work and who will be able to work well with others to improve the lifestyle of the local residents and users without having to rely on the local government and bureaucracy.

The Department of Regional Design offers the following four courses: Planning, Design, Urban Planning, and Environmental Design.
To stimulate intellectual pursuit and promote research and education compatible with today's highest standards

The Graduate School aims to graduate students who have gained an advanced level of understanding in their specific fields and who have acquired the ability to apply that knowledge in a variety of areas within society. To give people of all ages and occupations the opportunity to pursue graduate studies at TUC, all divisions of the Graduate School have both day and evening courses.

A Master's degree is awarded upon successful completion of the master's course. This course entails at least two years of study. A Doctoral degree is awarded upon completion of the doctoral course, which entails at least three years of study beyond the completion of the master's course.

The Graduate School offers a wide range of courses covering various fields of study. Students are encouraged to pursue their interests and develop their research skills. The school provides a supportive environment for academic growth and professional development.

## Tuition and Fees for the Academic Year 2018

### 平成 30 年度新入生学費減免案 / 平成 30 年度入学生における学生納付金等の

### Tuition Reduction System for International Students

In order to provide economic support for international students, Tohoku Gakuin University reduces tuition as follows:

#### Eligibility:

International students who are enrolled in a regular undergraduate or graduate program of our university and studying at their own expense.

#### Term:

Each period not exceeding four years for the undergraduate program, two years for the Master’s program and three years for the Doctor’s program.

#### Reduction amount:

The reduction rate for freshmen (First year) is 30% of tuition of an undergraduate and graduate program, for sophomore (Second year) or above, 50% of tuition of undergraduate program and 70% of tuition of graduate program.

### About Tuition and Fees

1. **Tuition Fee**:
   - Bursary: 4,500 yen per semester
   - Students: 4,500 yen per semester

2. **Academic Research Society Fee**:
   - Students: 1,200 yen per semester

3. **Engineering Society Fee**:
   - Students: 500 yen per semester

4. **Student Association Admission Fee**:
   - Students: 1,000 yen per semester

5. **Student Association Activity Fee**:
   - Students: 4,000 yen per semester

### Academic Calendar

**April 4th**: Orientation Day for International Students

**May 4th**: Graduation Ceremony

**June 3rd**: University Examinations

**July 7th**: Limited Application

**August 9th**: Graduation Ceremony

**September 8th**: University Examinations

**October 13th**: University Examinations

**November 10th**: University Examinations

**December 13th**: University Examinations

**January 23rd**: University Examinations

**February 20th**: University Examinations

**March 1st**: University Examinations
Tohoku Gakuin University (TGU) offers its students a variety of opportunities to interact and learn about different countries and cultures. Students are encouraged to develop a global perspective and the communication skills necessary for each student's personal development. As our world becomes increasingly internationalized, mutual understanding and respect of all countries and cultures has become a necessary endeavor, which is actively supported by TGU. The university currently has exchange and study abroad relationships with 23 universities in 12 countries, and the number of such relationships is expected to increase.

At TGU, students and staff members have numerous opportunities to learn to appreciate and interact with other cultures. Programs are geared to meet students' different needs and abilities. Programs can be as short as two weeks or as long as one year.

Exchange students have concurrent status at TGU and their host institution abroad. Credits earned at other universities are recognized as part of the credit requirements for graduation at TGU. For students at universities that have an exchange relationship with TGU, a number of courses are offered. Students who have attained sufficient Japanese language proficiency qualify to attend the same classes as regular TGU students.

For students who want to start learning Japanese or who have not attained proficiency in Japanese, a number of special courses are offered. Students interested in studying at TGU should contact the International Affairs Office.

東北大学と大学間学生交換を標準化し、グローバルな視野と積極的なコミュニケーション能力を養う。自らの潜在能力を開花するための多くの機会を提供しています。国際化が進み、相互理解が深まっている現代社会において、国際社会に貢献できるような人材を育成しており、現在、12カ国23大学と交換協定を結んでいます。

本学では、学生教育においても言語学習が重要であると理解しているが、教員や学生交流という形で、協定校と相互交流を行っています。短期留学（1年間）から長期（数年間）まで、多様なプログラムがあります。学生の希望に応じて、レベルごとにプログラムを提供しています。本学の学生が、海外学習プログラムに参加する場合、留用先で取得した単位は、条件を満たすと学ぶ手の単位に相当する単位または換算されます。

学生交換協定を締結している大学の学生の場合、一定の学歴レベルに達している学生は、本学と学生交流プログラムを受講することができます。日本語を学んだ学生は、日本語と異なる言語に習得することができる。
Japan Study Program
(April ~ / September ~)

DURATION: One semester / Two semesters
PERIOD: April ~ / September ~
CONTENT: This ‘Japan Study Program’ is designed for exchange students who have attained levels N3 to N1 in the JLPT, and starts from April and September every year. It aims to provide students with an understanding of Japanese culture, and improve their Japanese language skills by practical lessons and small classes. Students can choose either a one or two-semester program.

Economics & Japanese Program

DURATION: One semester
PERIOD: September ~ / February
CONTENT: This ‘Economics & Japanese Program’ is designed for exchange students who major in economics and study Japanese. The duration is one semester and starts from September every year. Students mainly take subjects of the Faculty of Economics such as a specialized seminar, or readings of non-Japanese language books. These subjects are conducted in English. Japanese classes are also required to improve Japanese languages skills.
